# WEB HOSTING & MANAGEMENT SERVICES

Our Web Hosting and Management has been providing affordable and reliable web hosting solutions. Whether you're a small business or just starting out, our affordable services can help your site stand out online.

We offer everything from basic (domain name) to premium (domain name).

## TESTING YOUR WHOLE WEBSITE ANNUALLY:

Test your whole website at least once a year and after making updates. Check that all features work, look for broken links, and watch for outdated or incorrect information. Bring in someone not associated with your company to get a fresh perspective on your site's usability.

## TESTING BROWSER COMPATIBILITY:

Test whether your website works correctly in several versions of mainstream browsers at least once a year.

## TESTING YOUR FORMS AND CHECKOUT PROCESS QUARTERLY:

At least once a quarter, make sure all your forms and your checkout process are working properly.

## CHECKING FOR SOFTWARE UPDATES MONTHLY:

Check for software updates from your hosting provider, security provider, and other third parties monthly. These updates help ensure proper functionality and security. Even better, install patches as they're released, if possible.

## BACKING UP YOUR WEBSITE:

Backing up your website can save you from losing a huge amount of time and money if something goes wrong with your site. If you have automatic backup feature check that it's working each month. If you don't have automatic backups, complete a manual backup at least once a month.

We build the foundation of your online presence and ensure that your business stands out from the rest by using the robust technologies in the industry.

Interactive, media-rich and personalized to make your visitors stay always engaged
